TECHNICAL SKILLS

React | Flask | Python
TensorFlow | PHP | REST API
Machine Learning | CI/CD
Docker | PostgreSQL | Linux
Bash | GitLab | Postman | GitHub

CERTIFICATIONS

AWS Cloud Technical Essentials(AWS)
AWS | 2026
React Basics (Meta).
Meta | 2026
Getting started with Git & GitHub
IBM | 2026
Introduction to Python
Kaggle | 2024
Introduction to Machine Learning
Kaggle | 2024

SOFT SKILLS

Problem Solving
Team Collaboration
Critical Thinking
Adaptability
Time Management

Rohana Harsha

Software Engineer | Sri Lanka |
Open to relocation

PROFILE

Junior Software Engineer experienced in building full-stack applications with React, Flask and python. Deploying them using hosting platforms and GitHub Actions via CI/CD. Completed a 6-Month internship at NSF building internal system used across the departments. Solid Grasp of REST API design, Linux Environment and automation scripting. Open to work in Software Engineer, DevOps or Cloud Engineering Roles.

EDUCATION

BSc (Hons) Industrial Information Technology

Uva Wellassa University, Sri Lanka

Thesis: Assessing the Digital Evidence Handling Process in Sri Lanka and Selected Jurisdictions

WORK EXPERIENCE

National Science Foundation, Sri Lanka | May – Nov 2025 Intern Software Engineer

Tech Stack: Flask / PostgreSQL / Docker / Bash / Rocky Linux

- Built a web-based asset & employee tracking system; reduced manual documentation by 90%.
- Centralized HR interface for skills, qualifications, and biodata review; automated Excel report generation.
- Developed and deployed an expert pool database managing 100+ expert records.
- Scripted Bash/Shell automation tasks, applied GitHub CI/CD Actions, deployed on Rocky Linux server.
- Created a Docker image with three isolated containers; managed TCP/IP networking and structured cabling.

PROJECTS

Hotel Guest Management System | Sep 2025

Flask · Vite · PocketBase

Integrated PocketBase as a new database layer, reducing response delay by 40%. Optimized deployment using GitHub Actions for fast, reliable CI/CD.

Property Management App — Daffodil Zone | Aug – Dec 2025

Flask · React · SQLAlchemy

Designed REST APIs and database blueprints for land, hotel, and agent listings. Used Agile methodology; tested with Postman; version control via GitHub Actions CI/CD.

Word Classification ML Model | Apr – Oct 2024

TensorFlow · NumPy · Pandas · Python

Self-studied TensorFlow to deploy a word classification model achieving 85% accuracy. Extracted real-estate keywords from natural language queries using ML classification.
